

AMSI PRB1 – Draft Content for Accessibility Standard: Portable Ramps in Older Buildings

First Edition –2025

Summary:

This draft provides practical guidelines for using portable ramps—such as folding and threshold ramps—to improve accessibility in older buildings not covered by current accessibility laws. It targets building owners, retailers, and community leaders seeking cost-effective, immediate access solutions for people with mobility challenges, including individuals with IDD.

Focus Areas:

- Ramp types, installation, safety, and maintenance
- Best practices for use, including signage and user education
- Legal and regulatory context
- Recommendations for step-by-step implementation

Status:

Draft material for a future AMSI accessibility standard; open for feedback and collaboration.
